About ATSG

ATSG is a global tech-enabled managed services and solutions company focused on innovative solutions to enhance today's digital enterprise and end-user experiences. ATSG provides Intelligent IT through Technology Solutions as a Service (TSaaS) to a variety of customers; leveraging an offerings portfolio of rediTech, rediManage, and rediSecure, which delivers reliable, elastic, dynamic infrastructure, collaboration, applications, as well as world class IT operations.

Information technology is critical to the success of every company, and the demand to leverage the latest IT capabilities for business advantage shows no signs of ever letting up. For IT organizations, this translates to a continuous cycle of selecting and deploying the best solutions and support strategies for the business.

However, the effectiveness of traditional acquisition and support approaches are diminishing in the new IT landscape. Solution complexity and cost, quick deployments, the time to develop an internal support practice, and the need to reduce operational costs can all be obstacles that IT organizations face when the business requires fast adoption of new technology.

ATSG's Technology Solutions as a Service (TSaaS) simplify IT by providing a complete, fully-managed solution that can be deployed and delivering results quickly. TSaaS combines our leading cloud and premises-based solutions with rediTech design and engineering services that target your business and IT objectives. We'll then provision and launch your solution, and our rediManage managed services will provide all support. The entire solution is delivered as a cost-effective service that aligns to your evolving business needs.

TSaaS Solutions

Our approach to helping companies leverage the power of IT sets us apart. ATSG's TSaaS portfolio includes:

Digital Workplace (DWaaS)
Streamline the process of acquiring, deploying and supporting servers, laptops, desktops and mobile devices. ATSG provides a complete solution with fully-managed endpoints and the OS, software, hardware and security services you need to operate efficiently.

Networks & Wi-fi
Keep employees and business services connected with high-performance network and wireless services that are engineered to your needs and deployed quickly. Our fully-managed solution includes all the infrastructure plus monitoring, Service Desk and incident resolution services to ensure high availability and great employee experiences.

TSaaS Services

Unified Communications & Contact Center

Improve employee productivity and collaboration with customers and business partners using the latest communications and customer experience solutions from Cisco and Microsoft. The experts at ATSG will design and deploy a UC solution that targets your specific business needs, and then back it with the helpdesk and operational support services that will drive results.

Management Solutions

Managing your environment is tough enough. Your team doesn't need the added challenge of staying on top of your management applications. ATSG leverages the knowledge gained from supporting tens of thousands of customer devices and applications to provide management applications and that will improve your visibility, service levels and workgroup efficiency. We'll then support the applications so your teams can spend their time where they're needed the most.

Business Continuity

ATSG's experienced team will provide, deploy and operate the resilient IT solution that enables your business to perform from any location and at any time. From empowering the remote workforce to preparedness for disasters, our portfolio of leading services and technologies contains everything you need to ensure the availability of business services and your ability to serve customers.

rediCompany

Our all-in-one service provides all of the IT technology and security solutions needed to run your business within a single, cost-effective bundle. ATSG's experts will then manage your complete environment and provide expert IT guidance so you can focus on the business.
