About ATSG

ATSG is a global tech-enabled managed services and solutions company focused on innovative solutions to enhance today's digital enterprise and end-user experiences. ATSG provides Intelligent IT through Technology Solutions as a Service (TSaaS) to a variety of customers; leveraging an offerings portfolio of rediTech, rediManage, and rediSecure, which delivers reliable, elastic, dynamic infrastructure, collaboration, applications, as well as world class IT operations.

Without a doubt, information technology is one of most critical investments a company can make. By driving business processes, customer experience and how employees work, IT now plays a major role in defining your brand. And the most successful companies today are the ones that have mastered how to use IT to innovate and gain advantage.

But as the demand to leverage the latest IT solutions grows, so does the challenge that IT organizations face. The technology landscape is constantly changing, and the number and complexity of solutions makes it difficult to determine which will achieve the best results for you. And in many cases, you simply can't afford to get it wrong.

ATSG and our rediTech services are here to ensure that your IT investments are delivering the maximum business value. We do that by partnering with you to define and execute the IT strategy that your company needs to succeed.

rediTech Works With Your Plan

We'll start by working with your teams to determine requirements and objectives, and exploring how the latest approaches and technology can be leveraged to transform and improve. We'll then help you navigate through all the options to determine what's best, whether that's a new IT solution or the need to optimize or upgrade what you now have.

Finally, we'll use your strategy as the guiding principle that drives the critical design and implementation phases to ensure that the necessary results are achieved.

Experience the difference with rediTech

Every ATSG rediTech engagement begins with same commitment to quality and care. Regardless of project size or scope your business can count on an experience that includes:

- Highly-qualified consultants
- Certified engineers
- Proven processes
- A portfolio of leading products
- A 25-year commitment to helping companies like yours

rediTech Services

Our approach to helping companies leverage the power of IT sets us apart.

Consulting

Our experienced consulting team will conduct a needs assessment to gain a complete understanding of your business and objectives. We'll then leverage our deep technical expertise, portfolio of leading IT solutions and customer success methodology to develop your options and make recommendations on what will deliver the best results.

Architecture

Our design experts will transform your objectives into the solution architecture that will achieve them. We'll guide the process to get input from your teams, and produce an innovative design based on your desired business process and what is needed to deliver the best customer and employee experience.

Procurement

We'll help identify the most cost-effective path to acquiring the solution you need. We leverage the latest manufacturer programs, analyze cloud vs. on-premise and other licensing options, and do whatever else is needed so you can make an informed decision on your purchase.

Engineering

Following the deployment plan produced for your specific environment, our certified engineers will perform the installation, configuration and integration steps to bring your solution to life. Our proven project management process will anticipate obstacles and proactively address them to reduce risk and ensure an on-time launch.

Implementation

We'll leverage the experience we have gained from thousands of successful implementations to help create the best launch plan for your business. We'll minimize disruption and focus on technology adoption so that you can realize benefits quickly. We'll then transition your solution to ATSG's rediManage managed services or your internal support team, and serve as your advisor for upgrades and optimization over its lifecycle to ensure that it continues to fulfill your business needs.
